# Minutes

**Meeting Title：meeting3**
**Date：29/04/2022**

Requirement of processing the mimic dataset

1. create a cohort of patients whose main procedure during admission is about CABG
2. create event sequence (trace) table by joining event tables such as drugs, transfer, labevent, admission, procedures using hadm_id, and sort them using charttime

Steps of Semester 1

1. explore and understand the mimic dataset
2. explore several methods to describe the clinical variabilities
3. decide which method to use and the reason behind it
